

**A**esthetic Dentistry of Georgetown is proud to announce the addition of Dr. Brittney Espinoza to better serve Georgetown and the surrounding areas with exceptional dentistry alongside Dr. Mandy Holley and Dr. Mark Duncan.

Dr. Espinoza completed her undergraduate degree at the University of Wyoming and her Doctor of Dental Surgery from Creighton School of Dentistry in 2012. After 3 years of practicing in

Austin, she moved back home to Jackson Hole, Wyoming to care for her grandparents and share her children with them. With the love of Austin constantly calling her back, she recently returned with her husband, 4 boys, and grandmother. Dentistry has been an important part of her life from an early age, as her mother was a dental hygienist for 41 years. Dr. Espinoza truly enjoys educating and motivating patients to build healthy oral habits, and loves seeing the smile of people who have benefited from her care. With her passion and experience, she is a perfect addition to this team and shares the focus on a whole-health approach with customized treatment planning for optimal health and beautiful smiles.

Aesthetic Dentistry of Georgetown has grown to be the resource for excellent dental care in the area and was founded in 2005 by Dr. Mandy Holley, a 2002 graduate of the University of Texas Dental School in Houston. The quality and service of Aesthetic Dentistry of Georgetown grew beyond the limits of one doctor and Dr. Duncan, a University of Oklahoma graduate, joined the team in 2016.

The combination of these three doctors brings nearly 50 years of experience and thousands of hours of training and education to provide the best options dentistry has to offer, including advanced cosmetic solutions, implants and dentures, sedation dentistry, chronic head and neck pain treatment, as well as airway and sleep solutions.

With the continual growth of Georgetown, Dr. Holley is excited to have Dr. Espinoza join her team so they can better serve the community and continue to build lifelong relationships with their patients.
